The position I am running for is Council. If elected, I would work with the rest of the Chief and Council to help address the challenges and issues of our Nation, such as improving housing for the Nation so more families can move back home to the Nation. I would also like to help assist the education department to improve graduation rates and to help the Nation Members get training and experience, so our Nation Members are ready to join the work force with confidence and find meaningful employment. Additionally, I will help the council carry on so we can bring our health center and gymnasium to reality, so our members have a better quality of life and a brighter future for our next generation.

A bit about myself, I am a quick learner, problem solver and a father to my beautiful daughter, Veronica. I recently married my wife, Melissa. I am currently employed at Salish Seaside RV Resort and Marina, which is owned by both Esquimalt and Songhees Nations. As an employee in the maintenance department, my primary duties include maintaining our Marina docks and RV grounds. Before this position, I was employed as a member of Maintenance for our Nation, keeping our Nation clean and maintained along side the rest of the maintenance staff.
